

NORTH LANARKSHIRE LOCAL DEVELOPMENT PLAN 2 NEWSLETTER

JANUARY 2025

We are working on the next [Local Development Plan](#) for North Lanarkshire. This new plan will look different and cover more topics than before, including more detail on the provisions for health, education and other facilities. It will also feature a delivery programme, outlining what needs to happen for each development, when it needs to happen, and who is responsible.

What we've been up to:

- **Evidence gathering:** consulting on various Evidence Topic Papers and seeking additional input from stakeholders.
- **Development plan scheme:** preparing a new scheme that outlines our timetable and engagement plans.
- **Open space strategy:** developing the version of this strategy for public consultation.
- **Working with others:** collaborating with South Lanarkshire Council, Public Health Scotland and NHS Lanarkshire on health priorities and other key matters.
- **Business and industry:** working with Glasgow City Region to address issues like vacant land and energy-efficient retrofits in commercial properties.
- **Community workshops:** holding a successful workshop on Local Place Plans and planning a follow up event in the new year.
- **Place survey:** launching a survey to gather community feedback on local issues for the new plan. The survey can be found [here](#).

Get involved We welcome any additional input you may have. Please get in touch if you have something to add to our thinking: LocalDevelopmentPlan@northlan.gov.uk

Stay tuned for more updates as we continue to shape the future of North Lanarkshire together!
